

A photograph of two people, likely healthcare professionals, in a meeting. One person is wearing glasses and a blue jacket, and the other is wearing glasses and a white lab coat with a red necklace. They are looking down at something on a table. The image is overlaid with a blue geometric pattern.

South Yorkshire and Bassetlaw

Approach and priority areas for building the STP

05 May 2016

Sustainability and Transformation Plans

...what are they?

...why do we need one and what are the opportunities?

...who's involved and what's our approach?

...what are the priorities?

...what are the timescales?

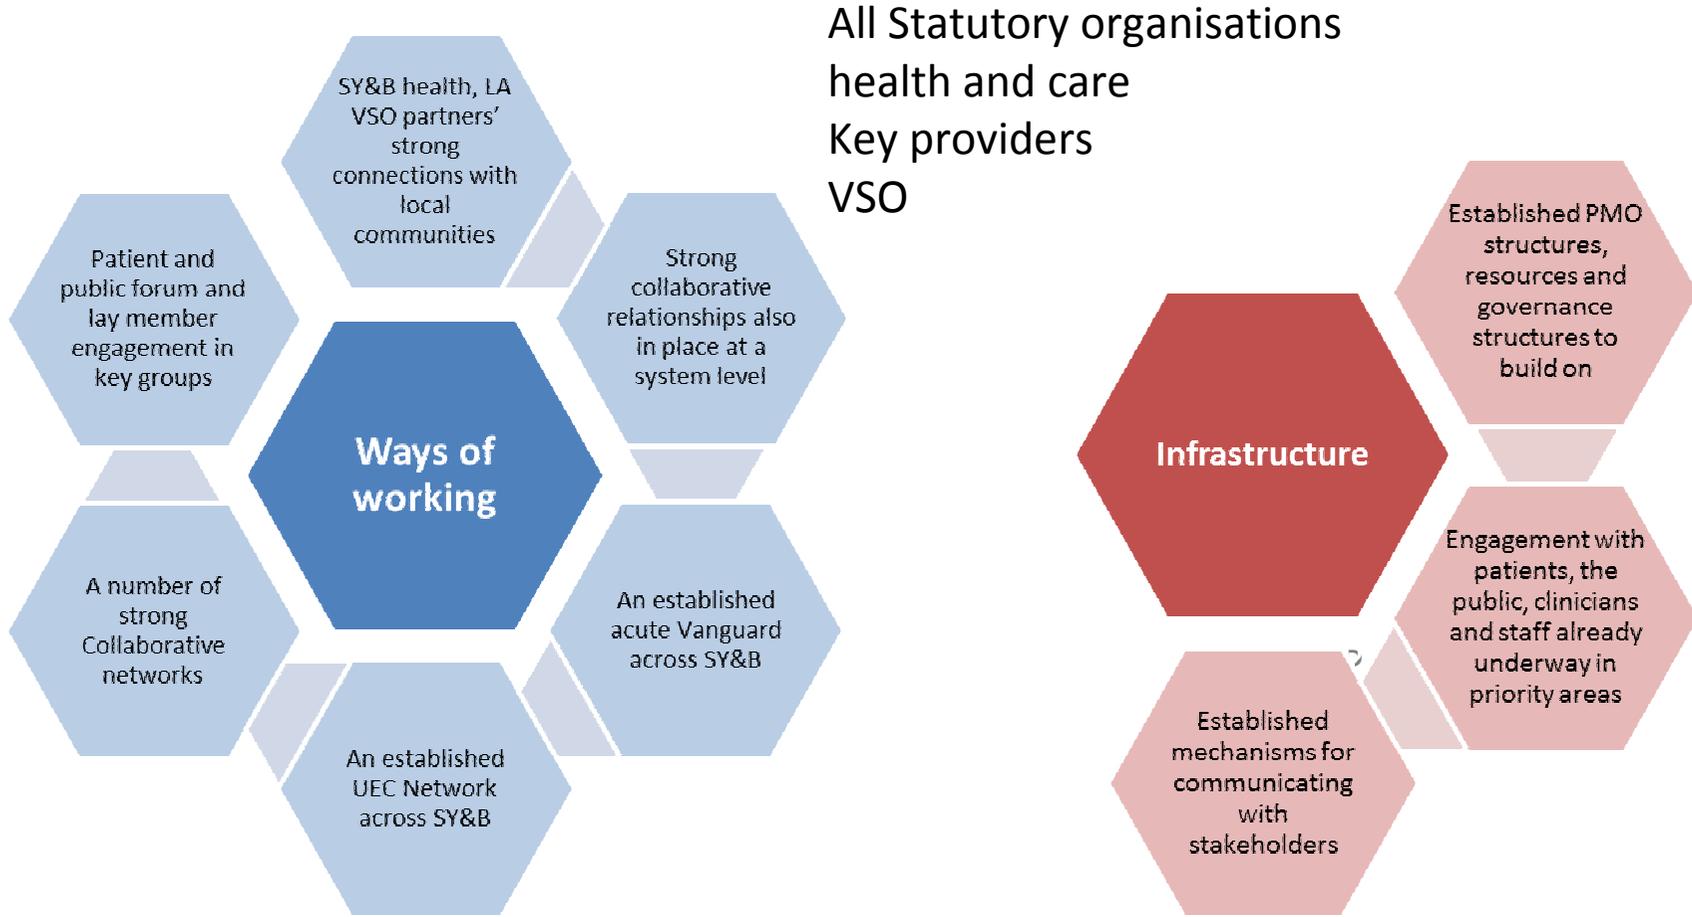

STP

Who Is Involved?

- People who use NHS services
- Voluntary sector
- Patient and public champions
- Local Authorities
- NHS organisations from across South Yorkshire and Bassetlaw
- Research colleagues
- Education colleagues

Building on existing to develop the SYB STP

All Statutory organisations
 health and care
 Key providers
 VSO

We are fortunate locally to have developed ways of working and infrastructure we can use to support us in addressing our challenges and building the STP

Key features of the plan

Guidance states that the 'big decisions' should also be addressed early. Local challenges and opportunities identified leave us with a number of issues we will need to resolve, these include:

- ✓ Set in the context of wider public services and public service reform
- ✓ Focus on population health, reducing inequalities and variation in health outcomes
- ✓ Radical and consistent upgrade in prevention and health and wellbeing
- ✓ Equity of access and quality of care
- ✓ Eliminating waste, duplication and scaled implementation of RightCare and the Carter Review
- ✓ A focussed and consistent approach to out-of-hospital care including primary and community
- ✓ Reconfiguration of acute services
- ✓ Mental health parity and learning disability

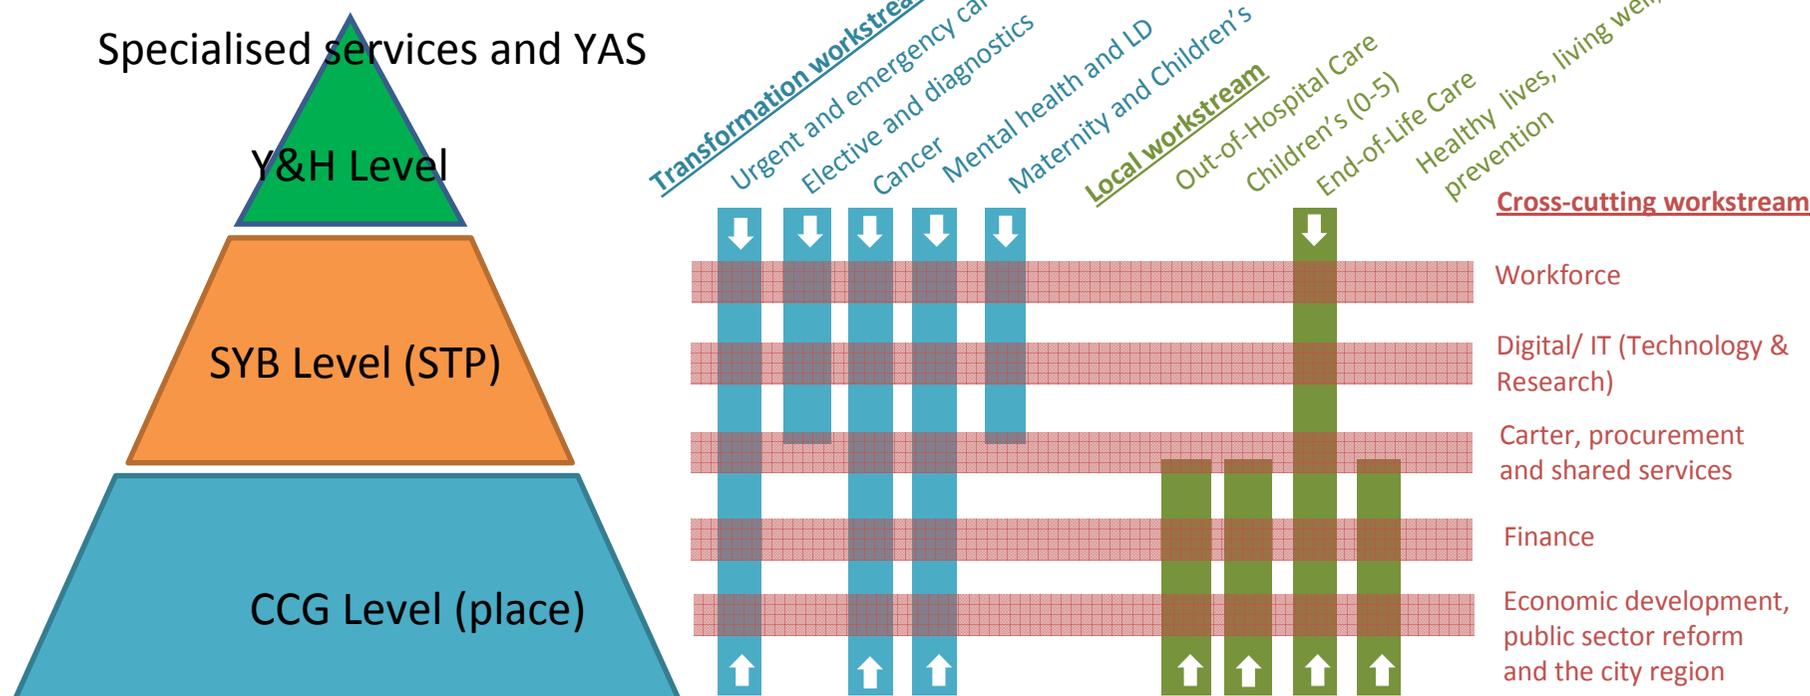

These 'big decisions' have informed how we have shaped our plan at both STP and CCG levels

Priority Workstreams

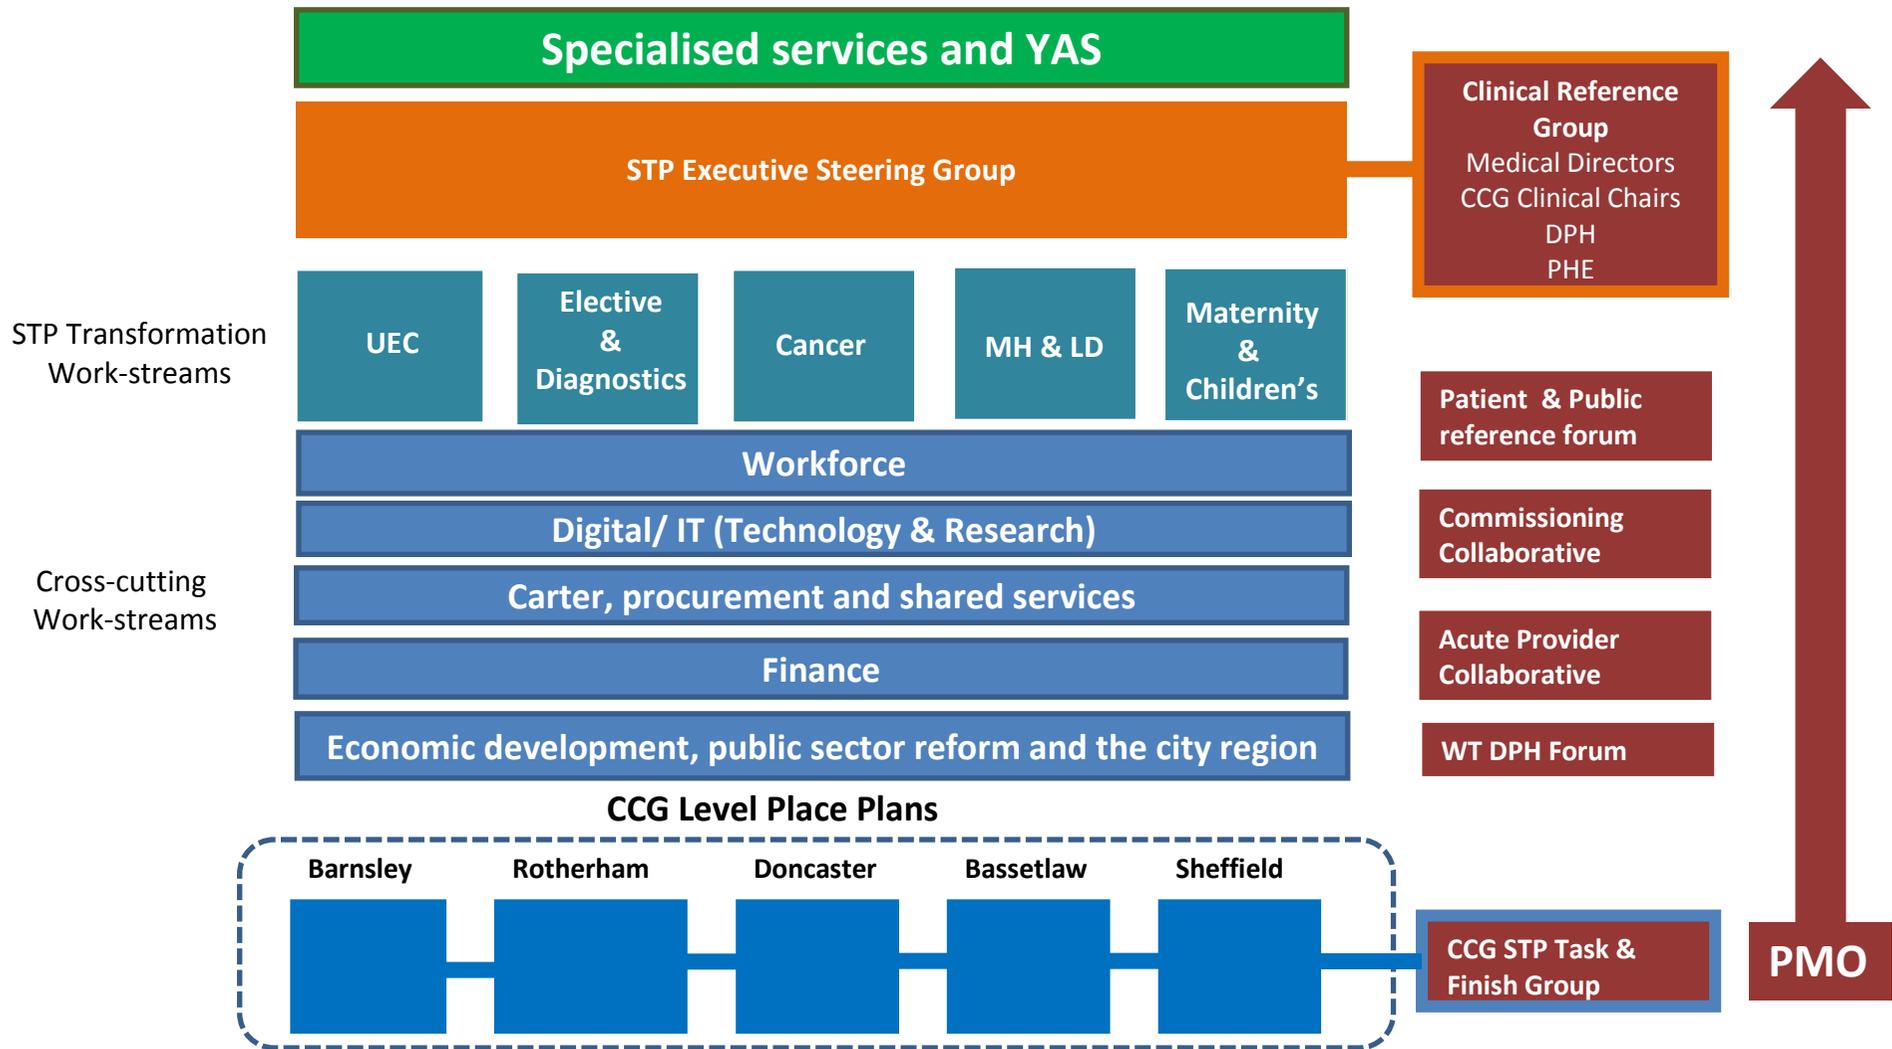

- Cross-cutting workstreams will cut across both local and transformation workstreams and there will be coordination between STP and CCG level planning, to ensure that synergies are exploited and to reduce duplication
- These workstreams will enable us to respond to priorities across the footprint and the STP's triple aims

Workstream type*	Definition
Transformation workstreams	Primarily 'top down' from an STP level, with some contribution from 'bottom-up' CCG-level planning
Local workstreams	Primarily 'bottom up' from a CCG-level, with some contribution from 'top-down' STP level planning
Cross-cutting workstreams	Workstreams primarily focused on enablers which 'cross-cut' intersect with local and transformation workstreams

Specialised services and YAS

The working framework for the STP

How we will work in partnership with others

Throughout building the STP plan we will engage on a number of levels and through many forums.

Local place engagement and discussions lead by CCGs in each of the 5 localities across South Yorkshire and Bassetlaw will underpin how we will work in partnership across SYB.

At an STP level we will work in partnership in three broad ways:

1. A guiding coalition of multiple key stakeholder across SYB coming together for a system-wide event on 25th April and 10th June
2. An executive steering group of STP work-stream leads meeting 2 weekly starting 18th April
3. A small cross-sector coordinating group via a weekly teleconference

Time table to submission

- ✓ 15th April – STP Draft submission national checkpoint 1
- ✓ 25th April – 1st SYB STP system-wide event
- 9 May – Combined Authorities Meeting
- 11th May – 1-1 National Team
- 19/20 STP timeout
- 10th June – 2nd SYB STP system-wide event
- 20th June – Combined Authorities Meeting
- 30th June – STP final submission national checkpoint 2
