Applications are invited for a residential course in neuroradiology to be held on 15th - 17th March 2017 at the Kenwood Hall Hotel, Sheffield S7 1NQ

www.ph-hotels.com/kenwoodhall

The course is aimed primarily at consultant general radiologists who require further proficiency in neuroradiology. The course will also be suitable for specialist registrars in radiology and those with a particular interest in neuroradiology.

The course consists of complementary lectures spread over a two-year cycle (see course programme, right).

Interactive sessions will supplement the lecture topics on both cycles of the course. A book stand will be available for the sale of medical books.

The course will begin on Wednesday lunchtime and finish on Friday lunchtime thereby allowing time for travel to and from Sheffield. The Kenwood Hall Hotel is set in 12 acres of parkland, yet only one mile from the centre of Sheffield. This hotel offers first class conference facilities and accommodation together with excellent leisure facilities.

The hotel is only a short taxi ride away from the railway station or there is complementary car parking at the hotel for delegates. The residential rate includes accommodation for Wednesday and Thursday.

The course is accredited for RCR CPD points

Course Programme
(Complementary lectures over a 2 year cycle)

The course is kindly sponsored by Bayer HealthCare
