

A	Committed leadership (number in brackets relates to references listed below the table)	Trust Self-Assessment
A1	Board record commitment to achieving the ambition of 100% of front line healthcare workers being vaccinated, and for any healthcare worker who decides on the balance of evidence and personal circumstance against getting the vaccine should anonymously mark their reason for doing so.	Complete
A2	Trust has ordered and provided the quadrivalent (QIV) flu vaccine for healthcare workers.	Complete
A3	Board receive an evaluation of the flu programme 2019-20, including data, successes, challenges and lessons learnt.	Complete
A4	Agree on a board champion for flu campaign.	Complete
A5	All board members receive flu vaccination and publicise this.	Complete
A6	Flu team formed with representatives from all directorates, staff groups and trade union representatives.	Complete
A7	Flu team to meet regularly from September 2019.	Complete
B	Communications plan	
B1	Rationale for the flu vaccination programme and myth busting to be published – sponsored by senior clinical leaders and trade unions.	Complete
B2	Drop in clinics and mobile vaccination schedule to be published electronically, on social media and on paper.	Complete
B3	Board and senior managers having their vaccinations to be publicised.	Complete
B4	Flu vaccination programme and access to vaccination on induction Programmes.	Complete
B5	Programme to be publicised on screensavers, posters and social media.	Complete
B6	Weekly feedback on percentage uptake for directorates, teams and professional groups.	Complete
C	Flexible accessibility	
C1	Peer vaccinators, ideally at least one in each clinical area to be identified, trained, released to vaccinate and empowered.	Complete
C2	Schedule for easy access drop in clinics agreed.	Complete
C3	Schedule for 24 hour mobile vaccinations to be agreed.	Complete
D	Incentives	
D1	Board to agree on incentives and how to publicise this.	Complete
D2	Success to be celebrated weekly.	Complete

Dear Colleague,

The national flu immunisation programme 2020 to 2021- update

1. We write with more information about this year's programme, further to the letter published on 14 May¹.

Expansion of the programme

2. In light of the risk of flu and COVID-19 co-circulating this winter, the national flu immunisation programme will be absolutely essential to protecting vulnerable people and supporting the resilience of the health and care system.
3. As indicated in our letter of 14 May, providers should focus on achieving maximum uptake of the flu vaccine in existing eligible groups, as they are most at risk from flu or in the case of children transmission to other members of the community. Appendix A provides the full list of those eligible in 2020/21 as part of the NHS funded flu vaccination programme. This includes individuals meeting existing flu eligibility criteria.
4. This year as part of our wider planning for winter, and subject to contractual negotiations, this season flu vaccination will be additionally offered to:
 - household contacts of those on the NHS Shielded Patient List. Specifically individuals who expect to share living accommodation with a shielded person on most days over the winter and therefore for whom continuing close contact is unavoidable.
 - children of school Year 7 age in secondary schools (those aged 11 on 31 August 2020).
 - health and social care workers employed through Direct Payment (personal budgets) and/or Personal Health Budgets, such as Personal Assistants, to deliver domiciliary care to patients and service users
5. We aim to further extend the vaccine programme in November and December to include the 50-64 year old age group subject to vaccine supply. This extension is being phased to allow you to prioritise those in at risk groups first. Providers will be

14 October 2020

Dear Colleague,

Daily submission of flu vaccination data for healthcare workers (HCW)

Following the [second annual flu letter](#) dated 5 August 2020, which set out the flu vaccination programme for frontline healthcare workers, I am writing to you now regarding reporting of uptake among staff in NHS trusts and independent providers.

All providers are now required to use a new national solution to capture key healthcare worker flu vaccination data. Timely access to information relevant to the uptake of flu vaccinations for healthcare workers will support flu planning and response activities at both a national and local level. This solution will also be used to track vaccination of at-risk groups, such as pregnant women.

This system will also be used to track vaccination status of staff for the COVID vaccine, when it becomes available, and providers will, therefore, not be required to introduce another reporting mechanism in future for this purpose.

The National Immunisation Vaccination System digital solution is already being used in multiple settings to capture flu information and Trusts that provide school-aged vaccination services will already be aware of it. The system can include ESR data pre-loaded in order that most information is pre-populated and additional information to be input by the vaccinator is kept to a minimum. The system allows for real time input on an individual basis or for bulk upload from existing recording mechanisms.

Two options for immediate implementation are available to trusts.

1. For those organisations with no existing system to record individual vaccination on a day by day basis, NIVS is required to be implemented.

2. For those organisations with an existing system in place to record individual vaccination on a day by day basis, export of existing data into NIVS is required.

As in previous seasons, the routine monthly PHE data collection for healthcare workers will continue to operate in parallel using the ImmForm website and IT remains official statistics for the Influenza immunisation programme. We recognise that questions around data governance will be at front and centre for organisations and include further information at Appendix 1.

Next steps involve ensuring the Trust lead for staff flu vaccination, usually NHS Trust Chief People Officers, Directors of HR, Chief Nursing Officers or Chief Operating Officers, engage with the programme rollout team for the NIVS digital solution.

- We require all trusts to submit their lead contacts to agem.nivs@nhs.net by no later than Monday 19 October 2020.
- Once lead implementors have been identified, information and how-to webinars will be scheduled from 21 October 2020 with multiple sessions being run over a number of days to support orientation and training.

If you have any questions about this programme, please email agem.nivs@nhs.net and the team will be happy to respond. You can also contact the national operations centre or regional flu leads for further information via england.nhsfluspoc@nhs.net.

The reporting and collection of real-time vaccination data is of paramount importance this year, ensuring consistency across all delivery settings, including primary care, pharmacies and at work.

Thank you again for your continued efforts.
